

Start-up Cost Calculator

What it actually costs to open the doors. Fill in the figures you know and leave the rest blank until you have quotes.

One-off costs to get started

- Registration and licensing fees
- Equipment, tools and machinery
- Furniture and fittings
- Opening stock or raw materials
- Deposits: premises, utilities, security
- Branding: logo, signage, printing
- Website and online setup
- Professional fees: legal, accounting, consulting

Total one-off costs

Add every line above

Contingency at 15 percent

Something always costs more than quoted

Monthly running costs

- Rent and service charges
- Salaries and wages, including your own
- Utilities: electricity, water, internet, airtime
- Transport and fuel
- Stock or materials per month
- Marketing and advertising
- Insurance
- Accounting, compliance and subscriptions

Total monthly running costs

Cash needed to cover three quiet months

Monthly costs multiplied by three

What you actually need to raise

One-off costs plus contingency

Plus three months of running costs

Total start-up capital required

This is the number to take to a funder
